CONCEALED LOCATION SPRING LOADED HINGES

FLUSHED CAM LATCH

OUTLINE OF TAPE JOINT

24" WOOD FRAME OPENING

20" ACCESS DOOR

26" ACCESS DOOR FRAME

Detailed description: The image is a technical drawing of an access door assembly. It consists of a top view and a side view. The top view shows a square access door opening measuring 20 inches by 20 inches, centered within a larger square frame measuring 26 inches by 26 inches. The frame has a 3-inch typical (TYP) offset from the opening. The frame is shown in a dark gray color, and the opening is white. Three hinges are indicated on the left side of the door, labeled 'CONCEALED LOCATION SPRING LOADED HINGES'. A cam latch is shown on the right side, labeled 'FLUSHED CAM LATCH'. A dashed line indicates the 'OUTLINE OF TAPE JOINT' between the door and the frame. The side view shows the door assembly installed within a '24" WOOD FRAME OPENING'. The door itself is 20 inches wide, and the frame is 26 inches wide. The door is shown in a closed position, with the cam latch visible on the right side. The drawing uses standard architectural conventions, including dimension lines, center lines, and hatching for different materials.
